

To Whom it may concern:

I would like to continue to receive Weather & Traffic Reports on XM radio. We live in a rural area and receive very poor normal radio reception so bought a satallite radio to receive various stations. We travel alot too and would like to know what forecasts are in store for us when travel by having traffic reports and weather information available to us on our XM Radio station. Thanks for your consideration.

We are Americans and enjoy our personal freedoms and choices also in radio stations and receiving this via satillite.
